```
86
      was complying with the Controlled Substances Act
 1
      between 2009 and 2014 whether HBC had any policies
 2
 3
      in writing during that timeframe?
                MR. BARNES: Object to form.
                THE WITNESS: They had procedures in
      writing.
 6
 7
      BY MR. ROTTINGHAUS:
 8
           Q. Now you're using procedures, not
 9
      policies. So I want to make sure I'm not getting
10
      confused.
11
               It's a definition from a Giant Eagle
12
      definition standpoint. So you can define policies
13
      and procedures however you want. We had
14
      procedures documented.
15
           When we went to get our DEA license, we had
16
      to have procedures documented. Otherwise, they
17
      would not have approved. The DEA approved our
      facility to be licensed. We had to have the
18
19
      required documentation and procedures put together
20
      on paper, and we showed them to the DEA officers
21
      who came in and inspected the facility prior to
22
      using it. And all of our procedures matched up
23
      with the Controlled Substances Act.
2.4
           Q. And these are in writing?
25
           A. They were in writing.
```

```
141
 1
      weekly movement, monthly movement, things like
 2
      that.
 3
           Q.
                Were you personally tasked with the
      responsibility to review the daily movement
 4
      reports to identify any movements of suspicious
      quantities of substances, or was there some other
 6
 7
      place to assist you in that?
 8
                MR. BARNES: Object to form.
 9
                THE WITNESS: There were other systems.
10
      I can't remember which reports that would flag
      certain things. The one I was speaking of was
11
12
      just a general second level safeguard where I can
13
      see if any movements were out of line from
14
      previous history.
15
           But there were other reports -- I can't think
16
      of the names of those reports -- that were out
17
      there that would look at movements of therapeutic
      categories of drugs specifically.
18
19
      BY MR. ROTTINGHAUS:
20
                So you at this point in time, from 2009
           Q.
21
      to 2014, sometime during that timeframe, you
22
      became a senior director of pharmacy?
23
           Α.
                Yes.
24
           Q.
                And when you became the senior director
      of pharmacy, were you overseeing all 200 something
25
```

142 1 Giant Eagle stores? 2 No, not the stores. I was overseeing 3 all of corporate functions at that point. So Anthony Mollica was still in charge of the 4 operations of the stores. I was responsible for 6 the contract management of any vendors, the 7 managed care side, which is the insurance 8 contracting piece of it kind of rolled up underneath me as well. So it was more at that 9 10 level. 11 Q. And I just want to make sure I 12 understand. During this timeframe from 2009 to 13 2014, you're telling us that one of the processes 14 in place was you would get a sheet of daily 15 movement of all of your medications, including 16 controlled substances, and you would personally look through that to try to identify any orders 17 that seemed out of the ordinary? 18 19 Α. We had buyers. 20 Q. First of all, am I correct in what I said? If I'm not, just correct me. 21 22 Oh, no, I mean, I didn't daily look at 23 those reports. We had buyers in place at that 24 time. We had a category manager in place at the time. So they would use that to generate their --25

```
143
 1
      as part of their reordering process. So when we
      reviewed that, they could also see any out of the
 2
 3
      norm patterns in that process.
           Q. And you're saying you're one of the
 4
      individuals that was reviewing and tasked and
 6
      responsible for reviewing for any out of the norm
 7
      patterns?
 8
                I didn't. When you mentioned senior
      director of pharmacy, no, I was not reviewing the
 9
10
      reports at that time.
11
               And that would have been between 2005 --
           Ο.
12
           A.
                Right.
13
           Q.
                I'm sorry. 2007 and 2012.
14
           Α.
               No senior director of pharmacy.
                2012 to 2014.
15
           Q.
16
           Α.
                Correct.
17
           Q.
                You were not doing so?
                I was not reviewing the daily reports
18
19
      back at that point.
20
           Q.
              Who was reviewing the daily reports at
21
      that time, if anyone?
22
           A. Kris Remas would have been reviewing
23
      reports as part of -- again, our daily process was
24
      to review the reports.
25
           Q. Now, when those reports would get
```

150 1 certain, but I do remember threshold emails coming from McKesson. 2 BY MR. ROTTINGHAUS: 3 And actually threshold criteria started Q. to get set for HBC as of 2013; is that right? 6 There was a report created, an automated 7 report created at that time. Q. 8 Whose idea was it to create that report? 9 I'm not sure who came up with the idea, 10 but it was a team that kind of worked on how do we come up with a process to do that. 11 12 Why was the team trying to come up with 13 a process to identify thresholds at HBC warehouse? 14 We were trying to enhance and improve 15 our process along the way. The process of identifying orders that 16 might be in excess of ordinary? 17 18 It would be targeting not orders 19 specifically. Thresholds don't catch one order. 20 Thresholds capture patterns of orders. So one 21 large is not, unless it exceeds the threshold, is 22 not going to be caught by the threshold. 23 What if it exceeded the threshold, what 24 did you expect to happen? 25 A. The order would be investigated.

Q. How would it be investigated?

- A. There would be a number of people that would find out what was going on with that store in particular that would do -- down at the PDL level, district leader level investigating what was going on at that particular store.
- Q. So this level started below you where the investigation would start?
- A. Below me and the operations department would go and look at what's going on in the store.
- Q. That's what I want to understand, is what your system was, who the people were that were eyeing these threshold reports and then reporting to whoever they reported to if there were orders exceeding thresholds and then what due diligence was done.
- A. So the overall security efforts of the, you know -- to meet the needs of this particular act or regulation encompassed many different parts of the whole process. So it would be -- we looked at ourselves as a self distributor. We had owned the product, and we're basically handing it off to another location within our chain.
- Unlike a wholesaler, which is selling to a new customer, a different customer, self

```
152
 1
      distribution, we knew our customers because they
 2
      were us. So we were very familiar with our
 3
      customers. We knew exactly what was going on.
      Each of these prescriptions were dispensed with a
 4
      valid prescription. So those were kind of the
 6
      added security measures that met the needs of the
 7
      requirement.
 8
                Are you able to sit here under oath
           Q.
 9
      today and tell us that every one of the
10
      prescriptions that HBC warehouse filled were
      filled with a valid prescription?
11
12
                MR. BARNES: Object to form.
13
                THE WITNESS: The HBC warehouse filled?
      BY MR. ROTTINGHAUS:
14
15
           Q.
                Yes.
16
                You mean the product coming from HBC
17
      warehouse?
18
           Q.
                Yes.
                I can't state, you know, something like
19
20
      that.
21
                I thought I heard you say that. I
22
      understand that you can't say that. I'm just
23
      wondering -- if you're able to say it, I wonder
2.4
      how.
25
           A. We act under the guise that our process
```

BY MR. ROTTINGHAUS:

- Q. Would one benefit of the documentation be the ability to show any regulatory body that HBC did indeed take steps to maintain a system, to implement, design and operate a system to disclose the presence of suspicious orders?
- A. When we opened HBC, we received our DEA, we were inspected by the DEA. They came in. They looked at all of our security features related to this Controlled Substances Act, looked at all of our processes.

Our security, according to them, fit all requirements, all the needed necessary steps. We were acting upon that. There was nothing in the provision that said we had to keep documentation for any period of time on any investigation.

We did our process. If there was any suspicion come up, we investigated it thoroughly, made our decision. And I can't even think of a time where we -- maybe there was a couple, but not that I can recall, an example when there was a suspicious order that we actually defined. I'm not saying it didn't happen, but I can't recall an example.

MR. ROTTINGHAUS: Object and move to

222 1 did you understand that to include an overall evaluation of the adequacy of the controls at the 2 HBC and store levels? 3 Α. Yes. Do you understand that the regulation that you were shown by plaintiffs' counsel is just 6 7 one small aspect of the overall security 8 requirement? Α. Correct, yes. 10 And do you understand that 1301.74 requires that HBC operated a system to disclose 11 12 suspicious orders? 1.3 Α. Yes. 14 Did you ever understand it to require 15 any type of formulaic or threshold system? 16 Α. No. At the warehouse level, I just want to 17 explore what you do understand. You mentioned 18 19 cages, things of that nature. 2.0 Were these control IIIs, IVs, and Vs kept in locked cages? 21 22 Yes, per the DEA requirements of 23 specifically around the cage. 24 Q. You said the DEA actually reviewed the HBC security system before it opened and started 25

```
223
      distributing control IIIs, IVs, and Vs?
 1
           A. Yes, before they approved our DEA
 2
 3
      license.
               And did they come in from time to time
 4
           Q.
      to reaudit and inspect?
           Α.
               Yes.
 6
 7
                MR. ROTTINGHAUS: Objection. Leading.
      BY MR. BARNES:
 8
           Q. At any time, did the DEA ever advise HBC
 9
10
      that there was anything lacking in their control
11
      system?
12
                MR. ROTTINGHAUS: Objection.
13
      Foundation.
                THE WITNESS: There was nothing pointed
14
15
      out within our security measures that didn't meet
16
      the requirements.
      BY MR. BARNES:
17
           Q. Did Giant Eagle ever distribute to
18
      internet pharmacies?
19
20
           Α.
               No.
21
           Q. By Giant Eagle I'm including HBC.
22
               No, we did not.
           Α.
23
           Q. But you've also told us that you don't
24
      really know the details -- you said the pickers
      were regulated in terms of access to the cages; is
25
```

```
224
 1
      that right?
           Α.
 2
                Yes.
 3
           Q.
                But the detailed procedures of how they
      actually did their picking and the forms they
 4
      filled out, that wasn't part of your job?
 6
           Α.
                No, it was not.
 7
                Were inventories conducted at HBC?
           Ο.
 8
           Α.
                Yes.
 9
           Q.
                Regular inventories?
10
           Α.
                Yes.
                Was the HBC warehouse overseen by Giant
11
           Q.
12
      Eagle's internal audit and accounting department?
13
                MR. ROTTINGHAUS: Objection. Leading.
                THE WITNESS: Yes.
14
15
      BY MR. BARNES:
                You were asked a lot of questions today
16
      about the development of a so-called SOM system in
17
      2013 or 2014. Do you recall that?
18
19
           Α.
                Yes.
20
                Was that threshold system I'll call it,
           Q.
21
      was that developed because there was any view that
22
      the currently existing controls that you describe
23
      were viewed as inadequate in any way?
24
           Α.
                No. They were put together as an
25
      enhancement to the current process.
```

225 1 Ο. And that process, that threshold process began in or about 2013? 2 3 Α. About per my recollection. Q. And were enhancements made to that 4 process over time? 5 6 Α. Yes. 7 Are you familiar with the CSOS system? Ο. 8 Α. Yes. Is that one of the enhancements? 9 Q. 10 CSOS was a system that just assisted in ordering CII through at the time it was the 11 12 wholesaler process, but it was -- it helped us --13 it was an enhancement for ordering CIIs, so from 14 that perspective. 15 Q. Are you familiar with Supply Logics? 16 Α. Yes. 17 Was that an enhancement to the threshold system? 18 19 Α. Yes. 20 What did Supply Logics allow you to do? Q. 21 Supply Logics had a couple components to Α. 22 it that could allow us to audit and monitor. So 23 it would -- I can't remember. I'm trying to 24 visualize what this report looked like, but it 25 would -- it basically would pull out -- allow us

226 to evaluate, investigate stores that were -- you 1 2 know, that stuck out in some fashion. 3 Q. At the pharmacy level you talked a little bit about some of the controls at that level. 6 I just want to ask you generally. Were all 7 of the pharmacies staffed by licensed and trained 8 pharmacists? Α. 9 Yes. 10 Ο. Were they staffed by trained technicians? 11 12 Α. Yes. 13 Were all of those individuals trained with respect to diversion? 14 15 There was a component of the training --I don't know specifically, but I know there were 16 some discussions in the training around that. 17 Q. Were there policies and procedures, 18 written policies and procedures in place at the 19 20 pharmacy level that assisted the pharmacists and 21 technicians with respect to filling appropriate 22 prescriptions? 23 Α. Yes. 24 Q. Are you familiar with the DEA pharmacist 25 manual?

```
227
 1
               MR. ROTTINGHAUS: Objection. Relevance.
 2
                THE WITNESS: I may have seen it. I
 3
      can't recall.
      BY MR. BARNES:
           Q. Do you recall if that was located at the
 6
      pharmacies or accessible by the pharmacies?
 7
           Α.
               Yeah. That should have been at each
      location, I believe.
 8
           Q. Did Giant Eagle have controlled
 9
10
      substance dispensing guidelines?
11
                There were guidelines around controlled
12
      substances, yes.
13
           Q. Did it include things like red flags,
14
      things to look out for before dispensing and
15
      filling a prescription?
           Α.
16
               Yes.
               MR. ROTTINGHAUS: Are you talking about
17
      at the pharmacy level or HBC level?
18
19
               MR. BARNES: Pharmacy level.
20
      BY MR. BARNES:
21
           Q. Are you familiar with the so-called
22
      OARRS system?
23
           Α.
               Yes.
24
           Q. What is that?
25
           A. It's an Ohio system to monitor
```

228 1 prescription dispensing across the whole state. Is that something to your knowledge the 2 3 Giant Eagle pharmacists would access when filling a prescription as necessary? 4 A. Yes, as required. 6 MR. ROTTINGHAUS: I didn't want to 7 interrupt. I'm interposing an objection on 8 relevance grounds. BY MR. BARNES: 9 10 Did the pharmacists or do the pharmacies 11 report their transactions to the DEA? I think you 12 already testified to that concerning the ARCOS 13 system. 14 Α. The ARCOS was one way. We also reported 15 dispensings through like the OARRS system and all 16 that. That was done at corporate level, but all that information about the stores came from 17 18 corporate that was provided. 19 Did Giant Eagle have written fraud, 20 waste and abuse guidelines and procedures that 21 were at the pharmacies? 22 Α. Yes. 23 The record keeping at the pharmacies, 24 are you familiar with the term controlled 25 substance boxes that maintain records?

229 1 Α. Yes. 2 Is that something when you were a PDL 3 you had to make sure every pharmacy complied with? Α. The boxes either came out like right 4 when I was going onto my other position, the physical boxes that you're talking about. It 6 7 was -- I didn't physically do that as a PDL. I think it came out just as I went on to my next 8 position. 9 10 Q. But in your next position, did you learn what those were? 11 12 A. Yes. 13 What were they for generally? Just to kind of keep everything in one 14 15 place around controlled substances. Would those include DEA forms, records 16 Ο. of invoices and transactions on controlled 17 substances? 18 19 A. DEA 222 forms, invoices, anything 20 regarding controlled substances. 21 Q. At the pharmacy level, were the 22 controlled substances handled any differently than 23 any other drug? 24 A. Were they handled differently? Yes. Q. Were they kept in a secure location? 25

230 Any of the Schedule II were kept in a 1 locked location that only the pharmacist had 2 3 access to. O. And who could fill a controlled substance II level prescription at the pharmacies? Could a tech do it, or was it a pharmacist 6 7 required? 8 MR. ROTTINGHAUS: Objection. Relevance. THE WITNESS: A pharmacist was required 9 10 to do that process. 11 BY MR. BARNES: 12 Q. And how were incoming orders of 13 controlled substances handled? Were there special procedures for those? 14 15 A. Yeah. We had formalized processes or procedures drawn up on how to receive an order, 16 and it even broke out controlled substances and 17 how to handle those orders specifically. 18 19 Q. Were those orders checked against 20 invoices and immediately logged into inventory? 21 A. Yes. 22 Were there regular and then perpetual 23 inventories of all controlled substances? 2.4 A. Yes. There were Schedule IIIs through Vs were part of our perpetual. The CIIs were done 25

```
231
      in a manual fashion. So we're talking 2009 to
 1
      '14. It became part of the perpetual throughout
 2
 3
      that time period.
           Q. You mentioned monthly narc audits. Was
 4
      that for all controlled substances?
 6
           Α.
                Yes.
 7
               And were there also annual controlled
           0.
      substance inventories on top of the monthly narc
 8
      audits?
 9
10
                MR. ROTTINGHAUS: Objection. Leading.
                THE WITNESS: I'm sorry. Say that
11
12
      again.
13
      BY MR. BARNES:
                In addition to the monthly narc audits,
14
15
      were there regular annual inventories?
                MR. ROTTINGHAUS: Same objection.
16
                THE WITNESS: Yeah. We were required to
17
      do an every two-year inventory. We actually did
18
19
      ours on an annual basis.
20
      BY MR. BARNES:
           Q. While controlled substance prescriptions
22
      were being filled, were there special accounting
23
      procedures employed to maintain control over every
24
     pill?
25
           A. Yes.
```

```
232
 1
                MR. ROTTINGHAUS: Objection. Leading.
 2
      BY MR. BARNES:
 3
           Q. Did the Ohio -- not only Ohio, but did
      the state Boards of Pharmacy come into the
      pharmacies on a random and unannounced basis and
 6
      perform surprise inspections on a routine basis?
 7
           Α.
                Yes.
 8
                Were there ever any problems that you
      can recall involving controlled substances or
 9
10
      opioids?
11
                Nothing specific to an inspection
12
      regarding those products.
13
           Q.
                And you were a PDL for a while?
14
           A. Yes.
15
                And you had a region where you regularly
           Q.
      visited all your stores?
16
17
           Α.
                Yes.
               Were all of the pharmacies supervised by
18
19
      a PDL in some way?
20
           Α.
                Yes.
21
                And did they regularly visit the store
22
      and conduct audits from time to time?
23
           Α.
                Yes.
24
           Q.
                And did that include controlled
      substance procedures?
25
```

233 Α. Yes. 1 2 Q. Did the PDL supervise training at the 3 pharmacies? Not directly supervise, but ensure that 4 all team members within that unit were trained. 6 Did the PDLs work with law enforcement 7 and the Board of Pharmacy to deter diversion and 8 prosecute criminals? MR. ROTTINGHAUS: Objection. Leading. 9 10 THE WITNESS: Yes. BY MR. BARNES: 11 12 Q. Did the PDLs exercise red flag awareness 13 training in the pharmacies? 14 A. Yes. 15 Would the PDLs have an opportunity to Q. observe while in these pharmacies suspicious 16 activity, such as long lines out the door, things 17 of that nature? 18 19 Α. Yes. 20 And I think you said when you were a Q. 21 PDL, you would assist from time to time with 22 threshold increases if the stores needed them; 23 right? 24 Α. When I was a PDL -- that was after I was a PDL when I was actually having the PDLs do the 25

251 1 RE-EXAMINATION 2 BY MR. BARNES: 3 Q. Just one follow-up question. After the threshold daily report was instituted in or about October of '13, did it reveal anything with 6 respect to the adequacy of the controls that were 7 already in place? 8 Α. Based on --9 MR. ROTTINGHAUS: Let me make a quick 10 objection. Insufficient foundation. 11 But go ahead. 12 THE WITNESS: Based on the limited 13 number of suspicious orders that were generated 14 afterwards, I would say, no, it didn't really add 15 a whole lot to the process. But, again, we looked 16 at it as an enhancement to what we had in place, 17 an extra stopgap. 18 BY MR. BARNES: 19 Did it indicate one way or the other 20 whether the controls in place were adequate? 21 A. I would evaluate it --22 MR. ROTTINGHAUS: Objection. Leading. 23 THE WITNESS: I would evaluate it to 24 show that we did have adequate controls in place from the beginning. 25

252 1 BY MR. BARNES: 2 Even after you instituted -- you 3 enhanced it with the threshold system? Α. Yes. MR. BARNES: Nothing further. RE-EXAMINATION (Continued) 6 7 BY MR. ROTTINGHAUS: 8 Prior to 2014, was there ever a system Q. 9 in place where anyone at HBC was instructed when 10 they had an order that exceeded thresholds to ask any particular questions of the pharmacy to find 11 12 out and do a little more due diligence as to why 13 the order was exceeding threshold? 14 When you say threshold, HBC wasn't 15 looking at threshold information. They would look 16 at unusual orders, being a large size, and that's 17 where they would ask the questions from. And was there ever at any point in time 18 19 to your knowledge any documented instruction to 20 anyone at or on behalf of HBC as to what specific 21 questions they should be asking of pharmacies when 22 they have an order that they thought was 23 extraordinarily large? 24 Their process was to notify myself or 25 someone else at corporate to do the investigation
